

Semantic Commit Messages

See how a minor change to your commit message style can make you a better programmer.

Format: `<type>(<scope>): <subject>`

`<scope>` is optional

Example

```
feat: add hat wobble
^--^  ^-----^
|      |
|      +--> Summary in present tense.
|
+-----> Type: chore, docs, feat, fix, refactor, style, or test.
```

More Examples:

- **feat**: (new feature for the user, not a new feature for build script)
- **fix**: (bug fix for the user, not a fix to a build script)
- **docs**: (changes to the documentation)
- **style**: (formatting, missing semi colons, etc; no production code change)
- **refactor**: (refactoring production code, eg. renaming a variable)
- **test**: (adding missing tests, refactoring tests; no production code change)
- **chore**: (updating grunt tasks etc; no production code change)
